

Project Profile

Type: Entertainment

USSI is providing service, preventative maintenance, and engineering services for 436 Repeater Network sites.

Project Overview:

Market Segment: Entertainment

Number of Sites: Over 400

Contract Duration: 2001 to present

Project Scope:

The repeater network carries a four (4) hour to six (6) hour response time and restoration of two to twenty-four hours based on the severity of the service needed. The sites are located within 46 major US markets.

Service Offering:

USSI provides around the clock service for a national broadcast satellite radio network. The services provided include management of preventative maintenance, service, and engineering support.

Customer Overview:

The client is an innovator and leader in the entertainment and data services markets for a variety of industries. Our customer has been in business for more than ten (10) years and has locations worldwide.

The Final Product:

The repeater networks are used in rural areas and highly populated areas to allow signals to be received around tall buildings and structures.

Summary:

USSI partners with our customer to provide a variety of services from maintenance to engineer services. USSI also performs periodic audits of sites to ensure all customer specified tasks and requirements have been fulfilled to the best of our ability.

About USSI:

USSI provides field maintenance and system integration for multiple technology markets including commercial communication systems, government weather & consumer sites, digital media and broadcast host locations.
